Engineering Education Programs at Bachelor Level Accredited by JABEE Last updated: 1 April 2016

JABEE has accredited engineering education programs in Japan since 2001. Listed here are engineering education programs of four-year undergraduate study/education at Bachelor Level, and accredited by JABEE. The institutions have voluntarily requested that specific engineering education programs be evaluated.

Programs are listed under higher education institution and in alphabetical order of program titles. The year indicated after each program title is the academic year when the programs were first accredited by JABEE (academic year starts from beginning of April and end at March). Comprehensive review visits are normally conducted at six-year intervals. Students are deemed to have graduated from an accredited program providing they graduate from the program within its validity period of accreditation. Programs discontinued as well as programs whose accreditation validity has expired are identified by showing a final school year of accreditation. Field shows which "Items to be Considered by Field" in "Criteria for Accrediting Engineering Education Programs" is applied to review the program.

JABEE has been admitted as a full signatory to the Washington Accord since June 2005. Recognition of the substantial equivalency of the accredited engineering education programs by the other signatories of the Washington Accord has been effective since June 2005.

In 2014, JABEE started accrediting Engineering Education Programs at Bachelor Level in oversea. Oversea accredited programs are listed with a note indicating that they are oversea accreditations. JABEE does not expect mutual recognition under the Washington Accord as they are out of jurisdiction accreditation.

JABEE also started Provisional Accreditation in 2014. Programs accredited under Provisional Accreditation are listed with a note accordingly.

Institution
